A motivated Bachelor of Industrial Technology major in Computer Technology student seeking an opportunity to develop my skills in UI/UX design, prototyping, and visual design while applying my knowledge in hardware, software, networking, and troubleshooting.

SKILLS

UI/UX Design • Wireframing and Prototyping • Responsive Web Design • Basic Back-End Development • Database Management • Python • C++, Java, MySQL • HTML, CSS • Critical Thinker • Cooperative • Proficient English• Strong Communication

TOOLS

Figma - Visual Studio Code - MySQL - Microsoft 365 - Google Workspace - Canva

WORKS AND PROJECTS

BulSU Website Redesign (Figma)
- An Industrial Interface Design and Development activity focused on redesigning the Bulacan State University website, including the landing page, news section, and academic program list.

Login & Register UI (Figma)
- An Industrial Interface Design and Development activity focused on designing an interactive landing page, login page and register page with custom made elements.

CIT Laboratory Inventory System (Figma)
- An Industrial Interface Design and Development group activity focused on designing a laboratory equipment inventory system for monitoring devices such as monitors, mice, and keyboards. The system also includes available and functional PC counters, device reporting, equipment updates, maintenance tracking, and maintenance request pages, using custom-made interface elements.

Amplified CIT Organizations (Figma)
- A figma make activity that showcases the different College of Industrial Technology organizations including their background, accomplishments and partner organizations

CiTracker: Classroom Attendance and Performance Monitoring App (Thesis)
- CiTracker is a thesis project built with Flutter and Supabase for managing classroom attendance and student performance. Students check in by tapping their phone or an NFC card, or by scanning their professor's QR code. Each account is tied to one registered phone to prevent proxy attendance. Check-ins work offline and sync automatically once internet returns, and each one records whether the student was on campus. The app also shows each student's enrolled classes, attendance history, live scores and grades, and lets them submit excuse letters to their professors.

EDUCATION

- **2027 - 2023** | Bulacan State University (Graduating)
- **2023 - 2017** | Dampol National High School - Stem Graduate
